Summary:

I am a software/web developer with a good background in programming and web development. I am skilled in both frontend and backend web frameworks. I'm seeking a position with a dynamic company where i can contribute my skills while also open to learning from more experienced developers.

Technical Skills:

Programming Languages: Python, JavaScript, Ruby on Rails, C

Frameworks/Libraries: Django, Reactjs, Redux, React Material UI, Node.js, Ruby on Rails, Django rest framework, Git, MongoDB, jQuery/Ajax, Bootstrap, WordPress

Project Experience:

* My Portfolio / Personal Website:

Features include display of skills and services i render as a fullstack web developer, showcasing all my web projects with links to each, and other features such fully functional social media blog site and available for use by all users, a weather app, news app (web scraper) ...

Technologies used: Python, django, beautifulSoup, HTML, CSS, Javascript, jQuery/Ajax

Github link: https://github.com/MayowaFunmi/django-portfolio-app-v2

* Pokemon App:

A reactjs project that comsumes pokemon API urls to display all available pokemons and the data stats for each.

Technologies used: Reactjs, Redux, React Material UI

Github link: https://github.com/MayowaFunmi/pokemon-app-reactjs

* Simple Reactjs Portfilio Website:

A simple and responsive portfolio website i created using reactjs to display all my projects and links to each of them.

Technologies used: Reactjs, css

Github link: https://github.com/MayowaFunmi/simple_reactjs-portfolio

* Basecamp Project:

This project is the first part of qwasar training exercise in fullstack development. It's to mirror the original basecamp website.

Technology: Ruby, Ruby on Rails, css

Github link: https://github.com/MayowaFunmi/Rails-Basecamp-Project

* Calculator App:

A basic calculator app created using reactjs.

Technology used: Reactjs, css

Github link: https://github.com/MayowaFunmi/reactjs-calculator-project

* CBT online Exam App:

This web app is a fullstack app created using django. It's a platform where examinations can be set and students can write exams (suited for secondary schools).

Technologies used: Python, django, HTML, CSS, Javascript, jQuery/Ajax

Github link: https://github.com/MayowaFunmi/online-exam-hall

* MySqliteRequest and MySqliteCLI project:

This is a 2-in-1 project. First, it writes from scratch each of sql commands such as SELECT, FROM, WHERE, UPDATE, ORDER_BY etc as methods using ruby language class object. Second, it creates a Command Line Interface of sql request using ruby language. All these without any sql command or syntax.

Technology used: Ruby

Certifications

* Qwasar Silicon;Value

       Introduction to fullstack development

* Qwasar Silicon Value

       Fullstack Engineering (including frontend, backend and database technologies)
